

A stylized graphic featuring a central globe with green continents and blue oceans. A red and white rocket is launching from the top right of the globe, following a dashed white orbital path. A white airplane is flying from the bottom left towards the globe. A satellite with a red body and yellow solar panels is in the bottom right, emitting concentric blue circles representing signal waves. The background is a solid dark blue, with a yellow sun in the top left and several white clouds scattered around the globe.

Elevator pitch

Have you ever wished to wander the world? Do you have have a list of travel dreams?

WanderList *keeps your travel wishes safe and brings you many inspiring travel locations and ideas you may have never even imagined. It provides a platform where you can share your travel ideas with fellow adventurers from all around the world.*

Come join us! Start your journey today and capture the beauty of the world with us!

Concept

WanderList empowers avid travelers to explore and fulfill their wanderlust. It offers a personalized space where users can create and curate their own travel wishlists, discover exciting destinations, and connect with a global community of fellow adventurers.

The motivation for developing **WanderList** stemmed from a passion for travel and a desire to create a platform that would inspire and empower fellow adventurers.

As an avid traveler, I want a platform to organize my travel wishes, discover new destinations, and connect with a community of like-minded adventurers.

Process

Technologies:

- Web Frameworks: Express, Express-handlebars
- Authentication and Session Management: Bcrypt, Connect-session-sequelize, Express-session
- Database and ORM: Mysql2, Sequelize
- Development and Environment: Dotenv, Nodemon
- Template Engine: Handlebars
- CSS Framework: Bootstrap

Challenges:

- GitHub conflicts
- Different time zones
- Technical knowledge

Breakdown:

Front-end: Kevin Small

Backend:

User Authentication:

Olena Pashchenko, Bandhavi Bendi

Pin routes, personal page, profile page:

Jennifer Rytikoff, Joshua Dempe

Success:

- Be able to use username instead of user ID in url
- Effective teamwork and dedication from every member allows us to accomplish further than basic requirement

Start planning for your
next adventure today

Future Development

- **More advanced authentication:** Enable email confirmation for sign-up and password reset
- **Terms and conditions:** Presenting rules and disclaimer to protect both user and development team.
- **Implementing public/share function:** Allowing more interactive experience for users by creating individual links for pins and adding the ability to make private pins.
- **Tags function:** Categorizing posts by various things like, activities and price range to enable better user filtering.
- **Automatic map pinning:** Using Google's Map and Places api to automatically place a user's pin on a world map.
